Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
	10/809,758	BIAGI ET AL.				
Office Action Summary	Examiner	Art Unit				
	JOEL M. LAMPRECHT	3737				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on <u>27 Fe</u>	ebruary 2009					
• • • • • • • • • • • • • • • • • • • •	action is non-final.					
<i>,</i> —	, 					
	closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims						
4)⊠ Claim(s) <u>1,3-12,14-23,26,29-31 and 33</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1,3-12,14-23,26,29-31 and 33</u> is/are rejected.						
7) Claim(s) is/are objected to.	,					
8) Claim(s) are subject to restriction and/or	election requirement.					
Application Papers						
9) The specification is objected to by the Examiner.						
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.						
Priority under 35 U.S.C. § 119						
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 						
Attachment(s) 1) ☑ Notice of References Cited (PTO-892)	4) ☐ Interview Summary	(PTO-413)				
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) Paper No(s)/Mail Date.						
3) Information Disclosure Statement(s) (PTO/SB/08) Paper No(s)/Mail Date 5) Notice of Informal Patent Application Other:						
	,					

DETAILED ACTION

Priority

Applicant is advised of possible benefits under 35 U.S.C. 119(a)-(d), wherein an application for patent filed in the United States may be entitled to the benefit of the filing date of a prior application filed in a foreign country. Should applicant claim foreign priority based on an application filed in Italy on 3/26/03 applicant must file a certified copy of the application as required by 35 U.S.C. 119(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3-12, 14-23, 26, 29-31, and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brock-Fisher et al (US 6,638,228B1) in view of . Brock-Fisher

Art Unit: 3737

et al disclose the use of an echographic contrast imaging method for generating images using microbubbles of blood vessels through the measurement of harmonic signals reflected after their excitation by a sinusoidal excitation signal (Col 3 Line 5-50, Col 1 Line 55-Col 2 Line 27, Col 5 Line 45-Col 6 Line 10) and filtered to extract components of the desired signal (Col 4 Line 25-45, Col 6 Line 27-45, Figure 2). The excitation signal induces the gaseous contrast agents to reflect a signal which is used to acquire data and provide displayed images of a plurality of echoes (Col 6 Line 15- Col 8 Line 52). The range of pressures used falls within the desired range, including a mechanical index of .05 - .5 (Col 10 Line 35-60) and the display of images allows for spatially distinct points of the parts under examination to be displayed simultaneously (Col 1 Line 10-25, Col 9 Line 45-Col 10 Line 31).

Brock-Fisher et al disclose all that is listed above, including the definition and disclosure of a range of mechanical indices that provide for their requirements within the method of contrast imaging. This general disclosure suggests that there are a broad range of mechanical indices which will allow for the methods of Brock-Fisher to take place and produce diagnostically relevant results. Attention is thereafter directed to the secondary reference to Wu et al (5,833,615) which discloses ranges of pressures and frequencies that are relevant and further discloses that there are a wide range of possible and diagnostically applicable combinations of frequency and pressure that are possible depending on the contrast agent being interrogated during imaging (Col 5 Line 35-Col 6 Line 55). Taking the teachings of Wu et al and applying this general knowledge and capacity for interrogation for differing contrast agents to the teachings of Brock-

Art Unit: 3737

Fisher et al which disclose important mechanical index limitations as defined by FDA, one of ordinary skill in the art at the time of the invention would have found it obvious to have produced a center frequency and pressure range that fell into both the FDA's requirements and provided for a useful signal with minimal noise as such is the goal of medical diagnostic imaging.

Response to Arguments

Applicant's arguments with respect to claims 1, 3-12, 14-23, 26, 29-31, and 33 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
